

Newly authorised feed materials and other developments in Risk management tools (April 2025)

Feed material (product code)	Remarks	As part of the risk assessment (RA)
Konjac gum, refined (4.075)	New risk assessment and new feed material	Konjac gum, refined
Ochrobactrum intermedium biomass, dried (12.032)	New risk assessment and new feed material	Ochrobactrum intermedium biomass, dried
Single cell proteins from fungi (12.031)	New risk assessment and new feed material	Single cell proteins from fungi
Caramelised sugars (13.185)	New risk assessment and new feed material	Caramelised sugars
Sodium chloride (from inorganic sources) (11.533)	Updated risk assessment. Relevant changes: 1- Updated feed material name and definition: 11.533. The risk assessment covers only inorganic sources 2- New possible processing aid: Calcium carbonate 3- Updated flow chart: detail 1	Sodium chloride
Sodium chloride (from chemical synthesis) (11.549) Feather free amino acids, hydrolysate (desalted) (9.095)	Updated risk assessment. Relevant changes: 1- Renamed risk assessment: from "Feather Protein, hydrolysed or Feather, pig hair and hoofs protein, hydrolysed" to "By-product from processing of feathers, pig hair and hoofs" 2- New feed materials: 9.095 and 11.549 3- New possible processing aid: hydrochloric acid 4- Updated flow chart: details 5 and 6	By-product from processing of feathers, pig hair and hoofs

New authorized feed materials and other developments in risk management tools (April 2025)

Feed material (product code)	Remarks	As part of the risk assessment (RA)
Garlic, dried (4.101)	Updated risk assessment. Relevant changes: 1- Renamed risk assessment: from "Garlic pulp" to "Garlic pulp & Garlic, dried" 2- New feed material: 4.101 3- New possible processing aid: (Tap) water 4- Updated flow chart: detail 2 and new detail 4 5- Updating table of hazards: replacing Polyethylene by packaging materials	Garlic pulp and garlic, dried
Quinoa husks (1.211)	Updated risk assessment. Relevant changes: 1- Renamed risk assessment: from "Quinoa seeds (pellet)" to "Quinoa seeds (pellet) & by-products" 2- New feed material: 1.211 3- Updated flow chart: details 1 and 2 4- Addition of annex on "process effect on hazards concentration"	Quinoa seeds (pellet) and by-products
Haemoglobin powder (9.031) Plasma powder (9.032)	Updated risk assessment. Relevant changes: 1- Updated feed material definition: 9.031 and 9.032 2- Updated flow chart: detail 1 3- Updated table of hazards: addition of biogenic amines	Haemoglobin-, globin- and plasma powder
Malting barley husks (1.219)	Updated risk assessment. Relevant changes: 1- New feed material: 1.219 2- Updated flow chart: detail 2 and products III	Beer industry by-products
Beetroot pomace, dried (4.111)	Updated risk assessment. Relevant changes: 1- Renamed risk assessment: from "beetroot juice" to "beetroot juice industry" 2- New feed material: 4.111 3- Updated flow chart: new detail 3 4- Updated table of hazards: replacing polyethylene by packaging materials and addition of pesticides	Beetroot juice industry
All feed materials within this risk assessment	Updated risk assessment. Relevant changes: 1- Updated table of hazards: addition of prohibited animal proteins	Fruit and vegetable processing industry (excluding fruit juice)

New authorized feed materials and other developments in risk management tools (April 2025)

Feed material (product code)	Remarks	As part of the risk assessment (RA)
Borage oil, refined (2.427)	Product removed from the Feed Material Register (FMR). Product is classified as feed additive in EU; for this reason, the definition has been updated and the remark added: "Not authorized as feed material in EU. Check legal status in other countries." Besides that, the FMR number is removed in synonyms.	See relevant risk assessments. Actions derived from continuous improvement service of the Product list of GMP+ International (gmpplus.org)
Potato starch, modified (4.023)	Product included in the EU catalogue of feed materials. Updated synonym to replace FMR number by EU catalogue of feed materials number 13.3.3	
Feather protein, hydrolysed (9.013) Feather protein, hydrolysed, solution (9.018)	Product updated in the EU catalogue of feed materials. Updated synonym to replace EU catalogue of feed materials number 9.11.1 by 9.6.1	
Acids oils mixture from chemical refining of various vegetable oils (13.031)	Updated definition in Dutch and German to align with English (removed the wording to animal products). The risk assessment covers only products of vegetable origin.
